

Business & Data Analyst Intern

Employer: Transim Technology Corporation

Transim is the worldwide leader in cloud-based engineering, design and support solutions for the semiconductor industry. The world's largest semiconductor manufacturers rely on Transim for hosting their design support solutions powered by our unique and proprietary technology. Headquartered in beautiful Portland, OR we are a fast growing and dynamic technology company.

We are expanding our team in search of a detail-oriented, creative, and self-motivated individual who would thrive in a fast-paced technology environment of web-based applications. The successful candidate will work in our satellite office in Pittsburgh, PA and will be responsible for creating, managing and issuing data reports and analytics related to Transim's web-based design centers. The candidate will also assist in inbound and outbound marketing activities (market research, advertising, etc.)

The qualified candidates should possess the following:

- Experience with SQL programming and working with multiple large databases
- Experience in importing data for use in report software, spreadsheets, graphs, and flow charts
- Familiar with web technologies and networking
- Strong analytical skills with attention to detail
- Microsoft Reporting Server experience a plus
- Google Analytics experience a plus
- Undergraduate degree (or currently in pursuit of) in either Technical (CS/IS/Engineering/Math major) or Business domains

Position Type:

Paid Internship: Up to 30 hours/week

Location:

Pittsburgh, Pennsylvania
