

CS0004: Assignment #3

Name: _____

Name: _____

Name: _____

Name: _____

Instructions

Go to the course web page. On the schedule for today there should be a link that says "Project with Holes", right click on it and select "Save Link As". Save the zip file to your desktop. On your desktop, right click the zip file you just downloaded and go to "7-zip", then "Extract Here". In this folder, open the .sln file. This is zodiac sign calculator project (a working executable of this is on the course web page as well). If you look at the code for the form, you will notice some segments and, in some cases, whole lines have been replaced with tags indicating where code needs to be added. Your job is to form a group of three or four and add the code needed to make this program work as shown in the example. DO NOT MODIFY THE EXISTING CODE.
