Detecting emotion on smartphones.

Researchers are developing a system to detect a person's emotions while they are talking on a smartphone or other device.

Group 1: You are the researchers. Describe all the wonderful potential applications for your project.

Group 2: You are social scientists and privacy watchdogs. Describe potential annoying, manipulative, or abusive uses.

Group 3: You are a team of technical experts and ethicists. Propose guidelines for the use of such technology.
